

RED LINE AIR TOOL OIL

- Protects rotary- and piston-type air tools with a light, thin fluid that holds its viscosity while controlling rust, noise and wear
- As used by Snap-on, Mac, and Cornwell teams in NHRA and NASCAR pit crews

PACKAGE SIZES:

80321 - Air Tool Oil - 8oz

ADDITIONAL INFORMATION

Red Line Synthetic Air Tool Oil is an excellent lubricant for rotary and piston-type pneumatic tools and hammers. Regular use helps prevent wear and rust while keeping the equipment clean and operating efficiently.

Directions:

Fill air line lubricator to required level or after using equipment, add one squirt – or about one-half teaspoon – through air inlet and operate until clean oil emerges.
